Dear Hiring Team,

I am writing to express my interest in the position at Ada. With a Bachelor of Science in Computer Science, a minor in Game Development from Western University, and much experience with development, I believe I have the skills and versatility to contribute meaningfully to your team.

I am a well-rounded generalist with strong expertise in multiple programming languages, including but not limited to Java, JavaScript, and Python. My diverse skill set allows me to adapt to different technologies and environments quickly, making me an ideal fit for Ada Health's dynamic development needs. During my time as a mentor for the First Robotics Team 5024, I developed and implemented robust software solutions in Java, and JavaScript, demonstrating my ability to tackle complex technical challenges.

In addition to my programming experience, I have practical knowledge of cloud services, particularly IBM Cloud, which I used during my projects. This experience, combined with my curiosity and eagerness to explore new technologies, aligns with Ada Health's commitment to innovation and continuous improvement. I am particularly interested in how Ada Health leverages AI and machine learning to enhance customer interactions, and I am excited about the opportunity to contribute to such groundbreaking work.

Throughout my career, I have embraced Agile methodologies, which I applied effectively in both my professional roles and academic projects. Whether coordinating camp programming at Camp OK or leading the development of the First Robotics Team 5024's robot, I have consistently utilized Agile principles to ensure timely and efficient project delivery.

I am eager to bring my broad technical skills, cloud experience, and passion for continuous learning to Ada Health. I look forward to the possibility of contributing to a team that is revolutionizing customer service through AI.

Thank you for considering my application. I am excited about the opportunity to discuss how my background and skills could align with your vision.

Sincerely,

Josh Bakelaar
